This report presents the compliance analysis for incident INC-20260405-041132. The analysis was performed by PlaybookPulse's multi-agent AI system, which evaluated adherence to established incident response playbooks and mapped findings to compliance frameworks.

Key Findings:

- Steps Fully Followed: 0
- Steps Partially Followed: 0
- Steps Not Followed: 10
- Overall Compliance Score: 0.0%

Playbook Information

Title: Incident Response Playbook: Database Credential Compromise

Total Steps: 10

Phases: Detection, Containment, Investigation, Eradication, Recovery, Post-Incident

Detailed Adherence Analysis

Step	Phase	Description	Adherence	Evidence
1	N/A	N/A	NONE	4 items found
2	N/A	N/A	NONE	No incident data was provided to assess whether the required actions ('Identify source of exposure', 'Determine affected systems', 'Classify severity', 'Update incident ticket') were completed.

3	N/A	N/A	NONE	2 items found
4	N/A	N/A	NONE	No incident data available to confirm any actions related to this playbook step.
5	N/A	N/A	NONE	No incident data available to confirm any actions were taken.
6	N/A	N/A	NONE	5 items found
7	N/A	N/A	NONE	No incident data was available to assess whether the 'Generate new database credentials, update all applications, test connectivity from dependent services, and remove old credentials from exposed locations' step was followed.
8	N/A	N/A	NONE	No evidence
9	N/A	N/A	NONE	No evidence
10	N/A	N/A	NONE	No incident data available to confirm any actions were taken for this playbook step.

Recommendations

- ■■ 10 playbook step(s) were not followed. Review and implement automation for these steps.
- ■ Gap identified: Inability to calculate the number of affected records due to lack of incident data.
- ■ Gap identified: No evidence that API keys/tokens were revoked.
- ■ Gap identified: Inability to prepare a preliminary impact report due to lack of incident data.
- ■ Compliance frameworks requiring attention: ComplianceFramework.SOC2_CC7, ComplianceFramework.NIST_SP_800_61
